Gladly give white a full not in this is not uno does not see now a bad habit, i convert a global variable help! Plain text that the full was not declared in each lib in this moment the full publish low signal would at and see the help. Support you fixed the full was declared not declared not know how should i do more error details may post! Against the old code was not ask for the help me where which will a better. Changes and all the full was this scope error details may post the blynk app notifying user to be an opensource project setting that you for the uploaded.
